

Jonnathan Barroso

Software Engineer | .NET | C# | Azure | Tech Lead

Itapevi, São Paulo — Brazil · macstudio.com.br · contato@macstudio.com.br

About

Software engineer with over 12 years of experience helping companies turn day-to-day operations into reliable systems, with a strong background in retail, point of sale (POS) and enterprise management (ERP). I work end to end — from full stack development to the architecture of distributed systems — with experience at startups and technology companies in Brazil and Portugal.

I know the modules that run the business firsthand: inventory, sales, finance (cash closing and reconciliation) and fiscal (NFC-e issuance and SEFAZ integration). I also worked with the TOTVS (Protheus) ERP, understanding the daily routines of the people who operate these processes.

This background gave me heightened attention to reliability and compliance — in systems that handle money and tax obligations, every detail matters. On the technical side, I work with C#/.NET back-end, Angular front-end and Microsoft Azure cloud; as a Solutions Architect, I drive strategic decisions (architecture, technical governance and mentoring), always aligned with business goals.

Experience

Genesis Digital Solutions

Lisbon, Portugal · Remote

Software Architect

Oct 2024 – Feb 2026

ACTIVITIES

- Back-end in .NET (C#) and front-end in Angular and Vue.
- Infrastructure as Code (Terraform) and CI/CD pipelines.
- Azure solutions (Web Apps, Functions, Storage, Service Bus, Database, VM).

RESULTS

- Designed a microservices architecture sized for 1,000 requests per minute.

Linked Tech

São Paulo, Brazil

Software Architect

Feb 2019 – Oct 2024

Design of scalable, highly available and resilient solutions. Responsible for translating complex business requirements into efficient technical architectures, balancing technological innovation with technical debt and operational costs. Focused on technical leadership, defining development standards and guiding teams to deliver high-impact products.

ACTIVITIES

- **Architecture Design:** defining architecture patterns (microservices, event-driven, distributed) aligned with the organization's long-term goals.
- **Technology Selection:** careful selection of tech stacks, languages and frameworks, weighing trade-offs between cost, performance and maintainability.
- **Technical Leadership and Mentoring:** guiding development teams (devs and tech leads), promoting code best practices (Clean Architecture and CQRS) and architecture review.
- **Risk Analysis and Mitigation:** proactive identification of performance bottlenecks and security vulnerabilities, ensuring system integrity and scalability.
- **Technical Debt Management:** balancing fast delivery (time-to-market) with the platform's long-term technical sustainability.
- **Integration and Governance:** defining policies for APIs, inter-system communication and cloud strategy.

RESULTS

- 80% reduction in production incidents, with robust automated testing (TDD/BDD) and observability.
- **Cost Optimization:** 30% reduction in monthly cloud infrastructure costs (Azure) through architecture adjustments and resource optimization.
- **Performance:** 300 ms reduction in average latency through caching strategies and query refactoring.
- **Scalability:** transition from a monolithic architecture (vertical scaling) to a horizontal model (scale-out), enabling elastic load distribution across instances on demand.
- **Delivery Cycle Optimization:** end-to-end CI/CD pipelines eliminating manual processes, cutting Lead Time for Change from hours to under 5 minutes.

Full Stack Developer

Sep 2018 – Jan 2019

ACTIVITIES

- Back-end (C#) and Angular front-end development for the POS.
- Payment (Stone POS) and delivery (iFood, Rappi) integrations.
- Infrastructure automation and CI/CD.

Iterative

São Paulo, Brazil

Full Stack Developer

Jun 2017 – Aug 2018

ACTIVITIES

- .NET API development (ConectCar project).
- Front-end best practices with Angular (Poder do Voto project).
- Web app (HTML/CSS/JS) for the Stone POS.

Betta Tecnologia

São Paulo, Brazil

Developer

Jan 2017 – Jun 2017

ACTIVITIES

- Development and maintenance of .NET and PHP systems.
- Served FMU and Anhembi Morumbi universities.

Link do Brasil

Barueri, São Paulo

Developer

Jul 2015 – Dec 2016

ACTIVITIES

- Internal systems in C# and VB.NET maintenance.
- TOTVS ERP technical support.

Intern

Jul 2013 – Jun 2015

ACTIVITIES

- Migration of legacy systems from VB6 to VB.NET.
- Internal systems maintenance and TOTVS ERP support.

Education

Bachelor's in Information Systems

2014 – 2017

UNINOVE — Universidade Nove de Julho

Technical degree in IT

2012 – 2013

FIEB — Instituto Técnico de Barueri

Skills

Back-end	C#, .NET, ASP.NET Core, VB.NET, Node.js, NestJS, REST APIs
Front-end	Angular, Vue, TypeScript, JavaScript, NgRx, RxJS, Angular Material, HTML, CSS/SCSS, Bootstrap
Data & ORM	SQL Server, PostgreSQL, MySQL, MongoDB, Redis, CouchDB, Elasticsearch, Entity Framework Core, Dapper
Architecture & Integrations	Microservices, Clean Architecture, DDD, CQRS, SSO/OAuth2 (Keycloak), Messaging (Azure Service Bus), Real-time (Socket.IO), Fiscal integration (NFC-e/SEFAZ)
Cloud & DevOps	Azure, AWS, Docker, Azure Container Apps, Azure DevOps, Terraform (IaC), Kubernetes, CI/CD
Tools & AI	Git, Swagger/OpenAPI, Claude Code, OpenCode, AntigraVity

Highlights

- Alura: 280+ courses completed and 11,427 exercises solved.
- 12+ years of experience in development and architecture.
